

The Role of Universities in Tackling Climate Challenges

Speaker: Professor Phil Taylor, Vice-Chancellor and President of the University of Bath

This lecture will provide insights into university leadership, as well as the research being carried out at the University of Bath in pursuit of net zero.

Professor Phil Taylor is the Vice-Chancellor of the University of Bath. He leads the Supergen Energy Networks Hub, a national research centre involving seven universities. The Supergen Energy Networks Hub aims to carry out adventurous collaborative research which can become a driving force towards rapid and safe transition to net zero. The speaker will talk about the research being carried out at the Hub and how it is making an impact on industry and Government policy.
